Context

Discussion topics and goals for this workshop are the Key Global Challenges for the Internet and Digital Technologies and Trends. Please see the Miro boards for more details. Please feel free to add comments and questions to the boards. Please also add your name to the boards if you contribute to them. Thanks!

Miro boards: Flow | Tech clusters | Challenges and risks | Take-Aways | Solutions

Key Flow Indicators

Key technological changes and new challenges and risks

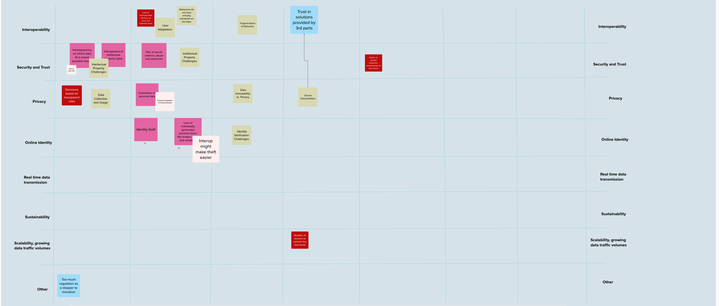
Flow

Technology clusters driving Web 4.0

Toolbox

AI & ML | AR/VR & Virtual Worlds | DLT & Blockchain | IoT | Quantum computing | Future networks & 5G/6G | General

Take-Aways



Interoperability | Security and Trust | Privacy | Online Identity | Real time data transmission | Sustainability | Scalability, growing data traffic volumes | Other

AI & ML | AR/VR & Virtual Worlds | DLT & Blockchain | IoT | Quantum computing | Future networks & 5G/6G | General

Inspiration/reference solutions

Translate challenges to solutions and governance

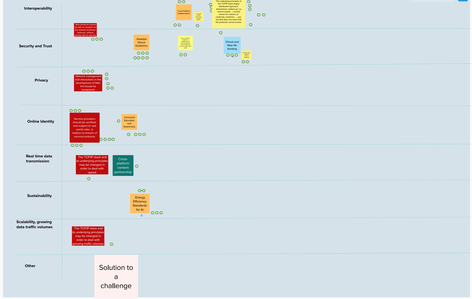
Specific focus on global, open Internet

Flow

Inspiration/reference solutions

Toolbox

Take-Aways



Interoperability | Security and Trust | Privacy | Online Identity | Real time data transmission | Sustainability | Scalability, growing data traffic volumes | Other

Solution to a challenge

Key technological changes and new challenges and risks

Flow

Technology clusters driving Web 4.0

Toolbox

AI & ML | AR/VR & Virtual Worlds | DLT & Blockchain | IoT | Quantum computing | Future networks & 5G/6G | General

Take-Aways

Interoperability | Security and Trust | Privacy | Online Identity | Real time data transmission | Sustainability | Scalability, growing data traffic volumes | Other

AI & ML | AR/VR & Virtual Worlds | DLT & Blockchain | IoT | Quantum computing | Future networks & 5G/6G | General

Translate challenges to solutions and governance

Specific focus on global, open Internet
